FIGURE 4

Digital representation of the above  
analog signals inverted

- $V_{PV}$  Power-up calibration point/compensation
- $V_2$  Point where AUTO Compensation is halted
- $V_4$  Point where the rail is out of the field
- $V_3$  Point where the rail is detected
- $V_1$  Point when the sensor has fallen off the rail
- $V_4 - V_3$  = the hysteresis
